IT202-450-M2024 - [IT202] Module 1 Getting Started

## Submissions:

Submission Selection

1 Submission [active] 5/27/2024 6:31:36 PM

## Instructions

^ COLLAPSE ^

Overview Video: <https://youtu.be/3pDB8m62tgM>

1. Create a repository on github, use the format `ucid-course-section` as the repository name.
2. Make sure it's set to private
3. Go to Settings -> Manage Access -> Invite Collaborator -> Search for my ID **MattToegel** and send an invite; if your section has a grader do the same for their github username (refer to course announcements)
  1. **Note:** Once in a while the invite doesn't get created correctly and you'll need to resend it, keep an eye on the acceptance of the invite since this is required for further HW validations. A comment will be left on Canvas for the submission if the invite is missing at the time of grading).
4. From the terminal / command line create a new branch called **M1-GettingStarted**
5. Create a README.md file and add it to the branch
6. Fill in some basic details:
  1. Course/Section
  2. Your name (first is fine)
  3. Brief info about yourself you'd like to share
7. Hint after creating the file
  1. `git add README.md`
  2. `git commit -m "my readme file"`
  3. `git push origin M1-GettingStarted`
  4. Create a pull request from this branch (via github.com)
  5. Don't merge/close the pull request yet
8. Fill in the below deliverables.
9. Once finished, ensure it's saved and click the "Export" button.
10. Move the generated PDF into your local repository folder at any location of your choosing.

## 11. Do the following commands

1. `git add .` (this will add all changes)
2. `git commit -m "adding output file"`
3. `git push origin M1-GettingStarted`

12. Go back to github and merge the pull request that was opened

13. Go to Canvas and upload the same PDF that you just downloaded and pushed to GitHub

**Note:** Having the submission saved and active keeps it eligible for grading.

Branch name: M1-GettingStarted

Tasks: 4 Points: 10.00

IDE Setup Evidence (2 pts.)

^COLLAPSE ^

Task #1 - Points: 1  
Text: Required Extensions

### #1) Show the PHP Extension

**Caption (required) ✓**  
*Describe/highlight what's being shown*  
Showing that I have the correct PHP Extension Installed

### #2) Show WakaTime Installed and

**Caption (required) ✓**  
*Describe/highlight what's being shown*

**Caption (required) ✓**  
*Describe/highlight what's being shown*  
Showing my SQL Extension Installed and Running

### #4) Show the MySQL Side Panel

**Caption (required) ✓**  
*Describe/highlight what's being shown*  
Showing my Database is created.

Reflection (6 pts.)

^COLLAPSE ^

Task #1 - Points: 1  
Text: Talk about what you learned during this module, anything interesting, new, etc.

**Details:**

Should be at least a few sentences for full credit

Response:

In this module I have learned on how to set up git, github account and php. It was really interesting learning about the SSH Key and how it works. I also learned how to set up the extensions on VS Code. A really important topic that I learned was how to connect my database from learn to the MySQL on VS Code.

^COLLAPSE ^

**Task #2 - Points: 1**

Text: Did you have any issues? If so, how did you resolve them? If no issues, just type "no issues"

Response:

I didnt have much issues but it took my some time to figure out the MySQL database and how to connect it to VSCode. I also got a bit confused on the first part of this module about creating the M1 Getting Started. But overall since it was my first time it took time but overall everything is well explained.

**Pull Request (2 pts.)**

^COLLAPSE ^

^COLLAPSE ^

**Task #1 - Points: 1**

Text: Add the pull request link here (it should end in /pull/#)

URL #1
